

AB
a client computer for accessing said server, wherein said at least one server
downloads said first program and said defining data to said client computer; and
a printer operatively coupled with said client computer, wherein said first program
assembles printing data for printing the printable product on the printer.

B1
10. (AMENDED) A computer usable medium having computer readable
program code means embodied therein for creating, modifying and printing of a printable
product, the computer readable program code means comprising:

AB
means for modifying a browser program on a personal computer of a user to allow
the user to edit the defining data within the browser program;
means for downloading data defining a printable product;
modification means for modifying the defining data; and
print formatting means for formatting the defining data for printing.

B1
13. (AMENDED) A computer readable program code means according to
claim 10, wherein said print formatting means performs at least one of the following functions:
resizing, scaling, and division into panels associated with a fold format.

AA
14. (AMENDED) A method for generating a printable product using an on-
line system accessible via a computer network, the method comprising:
storing on a server accessible via the computer network, data defining a plurality
of printable products including one or more design elements;
storing on the server a first program to enhance the functionality of a web browser
program by providing a user with modification functions for modifying the defining data, and
assembly functions for assembling a printable product suitable for printing, wherein the assembly
and modification functions occur within the web browser program on a client computer;
downloading the first program to the client computer accessing the server through
the web browser program, to provide for the user modification and printing of a printable product
at the client computer; and

A4

printing the printable product on a printer operatively coupled to the client
computer.

New claims

22. (NEW) A system for enabling a user to create and print a social expression product over a computer network, comprising:
a web server;
a personal computer of the user having means for communicating with the web server over the computer network;
a web browser located on the personal computer of the user;
a database storing defining data defining a plurality of printable products including one or more design elements, said database communicatively coupled to the web server;
a plug-in program stored on the web server and downloaded to the web browser loaded on the personal computer of the user, the plug-in program providing the user with means for retrieving defining data from the database, means for modifying the retrieved defining data and means for assembling a social expression product on the personal computer of the user; and
a printer operatively coupled to the personal computer of the user, wherein the user is able to print a social expression product at the personal computer of the user.

23. (NEW) A system for enabling a user to create and print a social expression product over a computer network, comprising:
a web server;
a personal computer of the user having means for communicating with the web server over the computer network;
a web browser located on the personal computer of the user;
a storage device containing defining data defining a plurality of printable products including one or more design elements;

a plug-in program stored on the web server and downloaded to the web browser loaded on the personal computer of the user, the plug-in program providing the user with means for retrieving defining data, means for modifying the retrieved defining data and means for assembling a social expression product on the personal computer of the user; and

a printer operatively coupled to the personal computer of the user, wherein the user is able to print a social expression product at the personal computer of the user.

24. (NEW) A system according to claim 23 wherein said storage devices is one of a group consisting of a remote storage device, a web server, a personal computer, and a storage medium.

25. (NEW) A system according to claim 23, wherein said plug-in program further provides the user with means for adding design elements from an external source, said added design elements created by the user.

26. (NEW) A computer readable program code means according to claim 10, wherein said data defining a printable product is stored on one of a group consisting of a remote storage device, a personal computer, and a portable storage medium.
